

## Three Legged Cross Nursery School

### Behaviour Management Policy

At Three Legged Cross Nursery School we have a shared vision that our school is and should be community orientated and that the principles of good behaviour must begin with the creation of a genuine sense of family, which encourages commitment to the school from all.

#### AIMS

- To maintain a happy school with a peaceful and productive environment
- To promote caring relationships within the school community.
- To acknowledge and respect everyone as an individual, regardless of gender, culture or special needs.
- To foster a consistent high expectation of behaviour where children can achieve their full potential

We use child initiated tasks during our golden time as a reward for acceptable behaviour and some of this time may be lost if there is unacceptable behaviour. Staff will assess the child's understanding of any unacceptable behaviour and may devise more personal approach as necessary. We will involve parents in any discussion about their child's behaviour. If harm is caused to another child the both sets of parents will be informed.

Throughout the school we aim to establish good behaviour, both during formal learning and during break and lunchtimes. Staff, governors, children and parents are all involved in the on-going evolution of the school policy on behaviour and anti-bullying. Consultation takes place to allow this school community based initiative to be successful. We are willing to adjust and make changes.

We aim to work with parents to secure acceptable behaviour. In some cases it may be necessary to consider referral to specialists in line with our Special Education Needs Policy. Serious cases of unacceptable behaviour may involve an exclusion from the nursery class for a fixed period.
